## Summary

Experienced Inventor with a demonstrated history of working in the computer hardware industry. Skilled in Sales, Management, Account Management, Software as a Service (SaaS), and Direct Sales. Strong engineering professional with a N/A focused in Voc Computers from T.C Williams. put to gather home independent energy for home's across the planet with device Rom-X

## Experience

### Inventor

Apple Basic with case number U.S.P.T.O Copyrights

May 2016 - Present (4 years 11 months +)

Working in A disk called General-Velocity-360-Wave-Compact-Disk.....The term DVD is an acronym for Digital Versatile Disc or Digital Video Disc. It refers to a type of optical media used for storing data and video content. They are nearly identical to CDs. The difference between CDs and DVDs is that CDs are used to store data and music while DVDs store video and program files. The capacity of a DVD is at least 7 times greater than a compact disc and provides enough room for a full-length feature film. It will support standard as well as widescreen television title views in 4:3 and 16:9 aspect ratios.

It was introduced to a test marketed US in 1997 and developed by Toshiba, Philips, Sony, and Time Warner. They are a consumer-friendly format primarily used for home entertainment for all mediums, as well as business needs, storage backup, and computer software. It had a strong reign over the global audio and video market by replacing videotapes, video cartridges, and laser-discs within a decade of its debut.

DVD technology is akin to the next generation of the compact disc in that it mirrors its technology. Both share the same dimensions of 1.2mm thickness and 120mm diameter. They have 4.7GB of available space, or 120 minutes. The DVD contains microscopic pits of binary data on its polycarbonate layer, as well as substrate, adhesive, reflective, and lacquered layers. It also has its singular exceptions from the CD

### To be their Inventor

Apple

Jan 2016 - Present (5 years 3 months +)

Possibility by Apple, A new sim card's that hold's 4.3 Gb instead of 64 Kilobyte's, this is A new type of Sim card at $29.99.

It is part of my CareerBuilder, portfolio an is referenced to my Resume as I Resume into the community

We all need one.

### Rom-X as to be there inventor to be used by G&E

GE Power

Feb 2019 - Present (2 years 2 months +)

A Device made out of A ROM Driver that has A (5.0) hole in the center of the Transparent Quartz Disc that use (2) Sink Cooper plates like A plate cut in half, as the plates clamp down on the transparent quartz (5.0) Spinning Disc as it rub's in between the sink copper clamps, it will produce energy with the laser as it is to hit the quartz disk on the Mont of Moore's law will draw energy in threw the mechanics of the device in the stigmatic of the 2 Copper sink clamp's that jauntily clamp down real light an draw energy from the 2 copper sink clamp's , a Simple device to run home independent energy an only cost customer $89.99 To run your own home and or industrial independent building on one Device, it is to spin at 1000 Celsius Degrees with the temp of cold fusion can be A concept out of the device which also the Device can run spacecraft material in flight an battery operated cars that will no longer need.

### To be their Inventor

Feb 2019 - Present (2 years 2 months +)

This is A Ram-Access Drive Device that can hold information of R.A.M of information to 1 Qubit's of Memory..

It is made out of Chemical Compound's of A Compactness disk

### To be their Inventor

Feb 2019 - Present (2 years 2 months +)

This is A C.P.U called Primeval an can do A clock set information in the system of A unknowing issue's A quantum (Qubit Concern's) an can be used with the D-Wave System,It is made out of Chemical Compound's of A Compactness disk

### to be their Inventor

Apple Basic

Feb 2019 - Present (2 years 2 months +)

This is A solar dot to antedated to your phone's with the new I-Phone Solar dot that you will no longer need' cord's when you would like to be free hand in business no more of the nonsense of trying to get the phone power's charged on A quick business run it will always be charged

Feb 2019 - Present (2 years 2 months +)

### Inventor

Apple Basic

Feb 2019 - Present (2 years 2 months +)

What your seeing is A Sim card called P-Sim for Primeval Card as in P-Sim card's this is A card that is An up grade that instead of holding "64" kilobytes it will hold #"4.2.Gigabytes" it is A card that is made of chemical compounds of A compact disk just like the old stander's it is A upgrade,

### Inventor

Apple Basic

Feb 2019 - Present (2 years 2 months +)
This is the prototype for Apple an is used in many different way's as which each chip is used for, as in A chip of "AMD" or Intel or IBM, A disk that use's over #234 Million assorted chip's, what it can do is give better an faster result's to script writing program's Rewrite capability ,is the disk at fast gaming programming,

### Freelance Writer
Arthouse PR
Dec 2003 - Present (17 years 4 months +)

### Inventor
Microsoft
Oct 2018 - Mar 2021 (2 years 6 months)
Information turn over of the "Ideal"--"General-Velocity-360-Wave-Compact-Disk"With the U.S.P.T.O office.....

### Inventor Of The Police-Cam
U.S. Department of Justice, Office of Justice Programs (OJP)
Apr 2003 - May 2016 (13 years 2 months)
In aspect to my ideal "Police-Cam" it's coming out was well wroth A beginning to my CareerBuilder an that it did not take my lawyer at that time with the "Accesspatentgroup" vary long to prose's, the ideal of the "Police-Cam", then it was done, it came out

### Clerk
Target
Jan 2001 - Dec 2001 (1 year)

### Clerk
Peoples Drug Store
Jul 2000 - Aug 2001 (1 year 2 months)
Clerk...

### Moper
Mcdonalds
Sep 1999 - Jul 2000 (11 months)
